

## **Engineering Analysis with Boundary Elements Best Paper Award**

In view of the high impact that many papers published in this journal have on the computational, engineering, and scientific fields, the Editorial Board of Engineering Analysis with Boundary Elements (EABE) approved the establishment of the Best Paper Award in 2018.

### **Rules and Criteria**

1. The Best Paper Award is an annual award.
2. The Award is designated to the paper and all its author/coauthors.
3. The award is based on papers published in EABE in the three preceding years.
4. A paper can receive the award only once.
5. Nominations are solicited from the Editorial Board members, and the journal Editors.
6. The Award Selection Committee is made of the Editors of the journal.
7. Generally, only one award will be given each year. However, in case of a tie, multiple awards can be given at the discretion of the Award Selection Committee.
8. The award criteria consist of
  - a. Originality and innovation of research
  - b. Impact to the field (citation may be used as an indicator)
9. The award consists of a certification letter, and will be publicized on the journal's web site and other media outlets.
