

Advances in Engineering Mechanics

a series of monograph in the field of engineering mechanics

published by Nova Science Publishers, Inc, 400 Oser Ave. Suite 1600, Hauppauge NY, 11788-3619, USA

Dear Professor Chen,

Nova Science Publishers has recently launched a new series of monographs in the field of engineering mechanics entitled "Advances in Engineering Mechanics". We are organizing a special volume with the topic "Advances in Computational Mechanics". The special volume will consist of 7 or 8 chapters contributed by the best Chinese researchers in computational mechanics. Each chapter should be approximately 40 printed pages and provide self-contained and fundamental knowledge of the given topic. The instructions for paper preparation can be found in the attached file or on the web page:

https://www.novapublishers.com/catalog/product_info.php?cPath=23_29&products_id=9756

As Guest Editors of the special volume, we are writing to invite you to submit a chapter concerning **Dual boundary element methods** to the special volume.

If you accept our invitation, please send us your postal address and the title of your chapter which you intend to submit to us at your earliest convenience (but no later than 30 May 2009). It will be very helpful if you could let us know whether you plan to submit a chapter to this special volume or not as soon as possible.

We look forward to hearing from you soon.

Sincerely yours,

Prof Qinghua Qin
Department of Engineering
Faculty of Engineering and IT
College of Engineering and Computer Science
The Australian National University
Canberra, ACT 2601, Australia

Prof. Bohua SUN
Centre for Mechanics, Smart Structures and Micro-Systems
Faculty of Engineering
