

海洋大學河海工程學系2004 工程數學 (三) 第一次小考參考解答

1. Given a spiral curve, we can describe by time-like parameter as follows:

$$x(t) = \cos(t), y(t) = \sin(t), z(t) = t$$

Please describe the curve by using space-like parameter (arc length s).

Ans: $\mathbf{r}(s) = (\cos(s/\sqrt{2}), \sin(s/\sqrt{2}), s/\sqrt{2})$.

2. Plot the curve from the starting point of $(1, 0, 0)$?

3. What is the distance of the arc length of the curve from $t = 0$ to $t = 2\pi$?

Ans: $2\sqrt{2}\pi$.

4. Please determine the radius of curvature for ρ and σ as shown below:

$$\begin{Bmatrix} \hat{\mathbf{t}} \\ \hat{\mathbf{n}} \\ \hat{\mathbf{b}} \end{Bmatrix} = \begin{bmatrix} 0 & \frac{1}{\rho} & 0 \\ -\frac{1}{\rho} & 0 & \frac{1}{\sigma} \\ 0 & -\frac{1}{\sigma} & 0 \end{bmatrix} \begin{Bmatrix} \hat{\mathbf{t}} \\ \hat{\mathbf{n}} \\ \hat{\mathbf{b}} \end{Bmatrix} \quad (1)$$

Ans: $\rho = 2, \sigma = 2$

5. Determine

$$\left(\frac{d\mathbf{r}}{ds} \times \frac{d^2\mathbf{r}}{ds^2} \right) \cdot \frac{d^3\mathbf{r}}{ds^3}$$

Ans: $\frac{1}{\rho^2\sigma}$
